

Supplementary application to hunt, take or destroy Hog Deer on private property outside the prescribed hunting Season

Hog Deer is a highly-valued and sustainably managed resource, with frameworks already in place to allow their recreational harvest and management on private property. An authorisation to hunt, take or destroy Hog Deer is not intended to replace the current management of recreational hunting, and will be assessed in this context. In addition, your application may be assessed by a Game Manager who may inspect the property to confirm the details set out in this application.

Complete this form when applying to hunt, take or destroy Hog Deer on private property outside the prescribed hunting season where applicants are acting in accordance with an approved management plan to increase commercial opportunities for Hog Deer hunting on their property. You must also complete the management plan template at: <http://www.gma.vic.gov.au/authorisations>. Follow the instructions on the template form and use the template to complete your management plan and attached it to your MyGL application, together with this form.

Property details (where hunting will occur)

Property Name

Flat / Unit / House Number

Street / Road Name.

City / Suburb / Town

State
